

This Action is responsive to the communication filed May 12, 2006.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Gagas '013.

Gagas '013 shows a rotary valve for a water conditioner including rotor 60, shown in Figure 3 having a through hole, unlabeled, connecting inlet space 140 with passage 142 leading to tank 22 and shown in Figure 8 as having two recesses 212, 215 on the lower face of the rotor and at the same “turning circle” as the through hole. Tank 22 is read as a filter.

Claims 2-3 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
